

Almaguin

COMMUNITY SAFETY AND WELL-BEING PLAN

Community Survey

The communities that make up the Villages of Almaguin are working together to create a Community Safety and Well-Being Plan that can be implemented with a regional goal of a sustainable community where everyone feels safe, has a sense of belonging and opportunities to participate and where individuals and families are able to meet their needs for education, health care, food, housing, income and social/cultural expression.

Currently the systems are responsive and often initiated at critical points to resolve social developments. The goal is to create multi-sectoral partnerships working together to mitigate critical path points and provide proactive solutions that reduce emergency events.

Social Development Chart and Wellbeing Matrix

Topics for consideration: crime, discrimination, education and skill development, employment, emotional violence, family support, financial security, food security, housing, settling to Canada, mental health and cognitive functioning, mobility safety/transportation safety, physical health, pro-social positive behaviour, social environment/neighbourhood, social support, social isolation, street level violence, substance abuse/addictions, victimization.

Why YOUR participation is important

Only by working together can the project partners truly understand the state of Almaguin's social development, and only with this understanding can we move toward meaningful change that will make significant transformations to individuals and families, ensuring they receive the right response, at the right time and by the right service provider.

Whatever part of the spectrum you are at, whether you are in need of assistance or the person providing services, completing this survey will allow the Almaguin communities to benchmark with a "current state of affairs" and create the path forward. Everyone has a role to play in community safety and well-being.

We thank you for taking the time to help shape the future of Almaguin
